

# EcoWay Litepaper

# Intro

**With EcoWay users can access mining of ecological cryptocurrencies without the need to build their own infrastructure.**

**Users who own ECY Tokens and stake them on the EcoWay Platform are granted rewards in the form of virtual currencies.**

# Experience led us here

**EcoWay team members are one of the most experienced and proven architects, and builders of cryptocurrency mining solutions in Europe.**

We have been mining Ethereum from the very beginning, and last year we saw a huge opportunity on the market with the introduction of a new, green protocol based on proof-of-spacetime consensus method.

It is a breakthrough consensus method used by Chia - a protocol introduced in early 2021 by Bram Cohen, who previously created the hugely popular peer-to-peer BitTorrent protocol that constitutes more worldwide data bandwidth than the usual FTP.

# Fully operational, scalable Infrastructure

We immediately started working on creating a fully functional, large-scale farming (mining) infrastructure utilizing this new protocol, and now, a year later we present you an opportunity to reap the benefits of proof-of-spacetime farming.

## **Our current infrastructure consists of:**

**170** plotters

**2500** drives

**10.1 pb** of space

All highly scalable, automated and managed by our proprietary software. We are focusing both on its further optimization, to make it the most efficient and environmentally-friendly, and its further expansion in terms of size.

# Ecology in the center

Proof-of-spacetime is the first new Nakamoto consensus since Bitcoin. It removes the heavy energy requirements of Proof-of-work consensus and embraces the current energy trends and sustainability. Chia is “seeded” onto the disk space in the form of “plots” - which are basically huge files containing cryptographic data.

The whole process uses a fraction of energy needed in traditional mining and is a perfect solution for the current worldwide push to restrict the energy-heavy crypto mining methods.

On top the above advantages EcoWay infrastructure gets its power from the partnered photovoltaic farm based on the same premises on the European Union territory.

This year Chia successfully developed a prototype for the World Bank’s Climate Warehouse. It has already passed the test phase and is now implemented in 200 countries worldwide.

# Use Case

# EcoWay Tokenomics

Ticker

**ECY**

Number  
of all tokens

**30 000 000  
ECY**

Circulating  
Supply

**22 500 000  
ECY**

Initial Market  
Cap

**5 000 000  
USD**

Initial Circulating  
Supply

**609 756  
ECY**

Initial  
Token Price

**8.2  
USD**

**The total supply (30 000 000 ECY)  
will be distributed as follows:**

**75%**  
TOKEN  
HOLDERS

**10%**  
FOUNDERS

**7%**  
MAINTENANCE  
COSTS

**5%**  
MARKETING

**3%**  
PARTNERS

The ECY Token can only be acquired in individual distribution rounds.

The ECY Tokens, in future, will be available for sale on external stock exchanges independent of EcoWay.

The ECY Tokens that will not be acquired in individual distribution rounds, will be burnt after the last distribution round.

# Team & Partners

## TEAM

The EcoWay team is a group of experienced developers, programmers, blockchain experts, lawyers and financial analysts. EcoWay team members are investors experienced in a wide range of business projects.

**Mariusz Popławski**  
CEO

**Łukasz Krasiński**  
COO

**Patryk Szafrąński**  
CTO

**Stanisław Bontemps**  
Advisor  
– Investor Relations

## PARTNERS

We actively cooperate with our experienced partners:
